BOOKKEEPER'S PATHWAY TO RPA

COURSE FRAMEWORK

FINANCIAL ACCOUNTING

Financial Accounting is a comprehensive course that equips students with a deep understanding of key concepts and principles in financial reporting, enabling them to analyze and interpret financial information accurately. This course covers a range of topics essential for individuals pursuing a career in accounting, finance, or business management. Students will gain proficiency in financial reporting concepts, the preparation and analysis of financial statements, income measurement, assets valuation, and various advanced accounting areas.

MANAGEMENT ACCOUNTING

Management Accounting is a comprehensive course designed to equip students with essential skills and knowledge in cost analysis, planning, decision-making, and financial statement interpretation. This course covers a range of topics crucial for individuals pursuing careers in accounting, finance, or business management. Students will gain proficiency in various aspects of cost management, budgeting, pricing strategies, and performance evaluation.

BUSINESS LAW

Law revolves around connections. It establishes, oversees, and resolves conflicts within these connections, which involve an individual and another entity in society. These connections cover various aspects: individual interactions with the government, interactions with society, and interactions between individuals. The main goal of this initial course is to furnish students with fundamental legal vocabulary and shed light on legal subjects relevant to business endeavors. Special attention will be given to topics like torts, contracts, the sale of goods, agency relationships, and business structures.

DATA ANALYTICS FOR ACCOUNTANTS

The Data Analytics and Technology in Accounting and Business course empowers students with the skills and knowledge necessary to leverage data for informed decision-making and strategic insights in accounting and business contexts. This course encompasses a comprehensive range of topics, enabling students to master data preparation, analysis, visualization, and business intelligence techniques. Students will also explore the intersection of data analytics with accounting, auditing, cybersecurity, and big data analysis using Python.

INCOME TAX I

This comprehensive course offers a thorough exploration of income taxation across diverse sources within the Canadian context. Delving into essential topics, the course encompasses matters such as taxpayer residency, obligations, and pertinent regulations. Through a comprehensive lens, students will navigate the intricacies of employment income, income derived from business activities, depreciation of capital property, eligible capital property, and income generated from property ownership. By examining these facets, students will gain an in-depth understanding of the complexities inherent in the Canadian income taxation landscape.

INCOME TAX II

Expanding on the groundwork laid in Taxation 1, this course delves further into federal income taxation in Canada. Topics include capital gains and losses, diverse income sources, deductions, and the computation of taxable income and taxes for individuals and corporations. This course provides an advanced exploration of Canadian income taxation, equipping students to navigate complex financial scenarios with confidence.

The Registered Professional Accountant (RPA) Designation

Learn – Unlearn - Relearn

An RPA Never Stops Learning!

To manage the financial records, accounting books and related matters, an RPA can do it better, you must first get proper education and training then manage your career with ethical behavior, organizational skills, and decision-making power. Only then can you effectively lead others to achieve maximum results. This designation will help increase your skills as a professional accountant and a leader in the industry.

You will learn the best practices and principles of successful accounting management, leading to continuous improvement in information, communication and productive decision making.

At this comprehensive education pathway to RPA for bookkeeping professionals, you will learn to communicate more confidently with business entrepreneurs and corporate executives at all levels within small to medium sized business enterprises, including difficult customer and employee relationship.

You will foster the professional skills needed to drive performance, orchestrate change, and develop your team.

You will learn to resolve difficult matters more effectively and gain valuable insights into coping with stress.

You will expand your interpersonal skills and influence, thus becoming a more accomplished and respected leader. You will refine your critical thinking abilities, learning to approach decision-making from a sound, logical perspective with cognitive approach.

In short, you will learn to manage business, people, resources and self!
